ANOTHER EXPEDITION TO FAR SOUTH SOON

Foster Stackhouse Party Charters Steamer Used by Scott for the Purpose.

(BY ASSOCIATED PRESS)

LONDON, Feb. 28.—The steamer, Discovery, which the late Captain Scott used in his first Antarctic voyage, has been chartered by the British Antarctic expedition which is to be commanded by J. Foster Stackhouse, and will leave London about the first of August for the far South. Mr. Stackhouse, whose exploratory work has heretofore been confined to Iceland, will have no attempt to reach the Pole. His main purpose will be to determine the coast line of King Edward VII Land on one side of the Antarctic circle, and Graham Land on the other. Between these two sections of discovery land stretches a vast and practically unexplored region. The expedition will attempt to determine whether this intervening space is land or sea, whether King Edward VII Land is part of the great Antarctic continent or merely an island or group of islands set in the frozen sea.

The existence of Graham Land, and of Coats Island, Enderby Land, and Kemp Land on the Atlantic border of the Great Ice Barrier, as well as the discovery of land south by Lieutenant Fliether of the German expedition in 1911, support the continental theory. On the other hand the great area of pack ice massed on the north and west coasts

of King Edward VII Land points, Mr. Stackhouse suggests, to the drift of ice northward from the Weddell Sea to Ross Sea, presumably through a strait separating King Edward VII Land from Graham Land. This is the most southerly of British possessions for the whole region between meridian 30 degrees west and meridian 80 degrees west is claimed for the British crown. The information which the expedition will obtain as to harbors, whaling stations and sealing grounds will be of great service to the whaling industry of the Falkland Islands.

The crew of the Discovery will consist of twenty-five men and in addition there will be five scientists. Several of the ship's officers also undertake scientific observations. They will have an aeroplane for photographic survey work and this too will be useful in enabling the leader to choose the best route when he wants to advance. Most of the navigation and scientific staff have already been chosen. Lieutenant A. E. Harbord, of the Royal Navy, who was navigation officer on the Nimrod in the Shackleton expedition will command the Discovery. The first officer will be Lieutenant Kien and H. Garstin, of the Royal Indian marine, who has a considerable knowledge of surveying, and the investigating officer, who comes from the same service, will be Lieutenant R. Beatty, a cousin of Rear Admiral David Beatty. Chief Petty Officer Tom Green, who sailed with Scott in both his Discovery and Terra Nova

expeditions, will be boatswain. Among the scientific staff will be Lord Condon of the Grenadier Guards, who has done a great deal of military survey work; the Master of Sempill, only son of Lord Sempill, has served his apprenticeship in engineering, and will have charge of the meteorological department; the electrical plant and the motor boat and aeroplane engine, Captain A. S. Cantrell, who has been lent by the admiralty, will have charge of the survey work; W. H. Stewart Garnett, M. A., an expert on silk and qualified marine engineer, and D. Hector Pearson, an officer in the Essex territorial, will be one of the surveyors.

The expedition will be away for three or four years. From Cape

HIGH PRAISE FOR BEAR'S EMULSION.

His Wife Used Several Remedies But Got No Benefit Until She Tried Bear's Emulsion.

John D. Bear, Elkton, Va. Dear Sir:—Last winter my wife took a very severe attack of grippe, which left her with a very bad cough. For a month I could see she was gradually getting weaker and losing flesh. During the time she tried several different remedies but none did a particle of good until I bought a bottle of Bear's Emulsion. In three days my wife began to improve and after taking three bottles she was much stronger and weighed more than she had for seven years. It gives me much pleasure to recommend your preparation, and I shall never be too busy to praise it to anyone.

J. T. NAYLOR.

Elkton, Va. R. F. D. This preparation has been tried and proven to be one of the best tonics, system and tissue builder ever sold. It has cured people right at your door almost. There have been more testimonials published from this remedy from the people of your own locality than any other preparation advertised.

One dollar a bottle or six bottles for five dollars. Sold by Frank G. Bland and Stone & Mercer, druggists.—Advertisement.

Dangers of a Cold. Do you know that of all the minor ailments colds are by far the most dangerous? It is not the colds themselves that you need to fear, but the serious diseases that they so often lead to. For that reason every cold should be gotten rid of with the least possible delay. To accomplish this you will find Chamberlain's Cough Remedy of great help to you. It loosens a cold, relieves the lungs, aids expectoration and enables the system to throw off the cold. For sale by all dealers.—Advertisement.

town, where the scientific instruments will be finally tested, the Discovery will sail to the Balkan Islands, a distance of about 5,000 miles. Deep sea soundings, which will have considerable hydrographic value, will be taken in these infrequently frequented seas. On the way the exact number of islands contained in the sandwich group and determining the position of the Shag Rocks. Discussing his plans, Mr. Stackhouse said: "After calling at the Falklands, the Discovery will proceed to the east side of Graham Land. Here I propose to land a party of fifteen about December 20. Their task will be to determine a doubt as to the insularity of Graham Land. The existence of a strait between Graham Land and would explain the great accumulation of ice between that land and the Great Barrier. This part of the expedition will have the assistance of the airman. He will, I am convinced, save them much useless sledging and hauling. They will also carry out a large amount of survey work, remaining together twelve or fourteen months. Meanwhile the Discovery will proceed to Larsen's Sea and endeavor to fix the coast between Graham Land and the base of the last German expedition about 75 degrees south.

"Returning after wintering in the ice, we will pick up the land party about January, 1916, and then endeavor to make Charcot Land. We will leave early in 1917 for New Zealand."

GOFF WELL

On Rock Camp Run in Sardis District is Declining Very Rapidly.

On Rock Camp run, Sardis district, this county, Senator Nathan Goff's No. 51 on his own farm, which came in flowing at the rate of twenty-five barrels an hour, failed to keep up the pace and declined rapidly. For the last twenty-four hours it produced 156 barrels. Unless it improves with deeper drilling it will not prove nearly so good a producer as No. 50 on the same farm. Sardis District is furnishing the most of the new production found in the West Virginia fields.

Cattle Foot Disease Cure

REMARKABLE CASE of Mrs. HAM

Declares Lydia E. Pinkham's Vegetable Compound Saved Her Life and Sanity.

Shamrock, Mo.—"I feel it my duty to tell the public the condition of my health before using your medicine. I had falling, inflammation and congestion, female weakness, pains in both sides, backaches and bearing down pains, was short of memory, nervous, impatient, passed sleepless nights, and had neither strength nor energy. There was always a fear and dread in my mind, I had cold, nervous, weak spells, hot flashes over my body. I had a place in my right side that was so sore that I could hardly bear the weight of my clothes. I tried medicines and doctors, but they did me little good, and I never expected to get out again. I got Lydia E. Pinkham's Vegetable Compound and Blood Purifier, and I certainly would have been in grave or in an asylum if your medicines had not saved me. But now I can work all day, sleep well at night, eat anything I want, have no hot flashes or weak, nervous spells. All pains, aches, fears and dreads are gone, my house, children and husband are no longer neglected, as I am almost entirely free of the bad symptoms I had before taking your remedies, and all is pleasure and happiness in my home."

Mrs. JOSIE HAM, R. F. D. 1, Box 22, Shamrock, Missouri. If you want special advice write Lydia E. Pinkham Medicine Co., (confidential) Lynn, Mass.

True Values. B & B True Values.

Waists of voile and cotton crepes low neck, long and three-quarter sleeves—made with dainty embroidered front, finished with trills of net or voile, \$2.00.

Boggs & Buhl.

PITTSBURGH, PA.

As Well as That of the Month is Now Probably Discovered in Germany.

(BY ASSOCIATED PRESS)

BERLIN, Feb. 28.—Cattleraisers in Germany are eagerly awaiting a decision by the government as to the merits of the cure for foot and mouth disease announced recently by Prof. Ludwig Bräger, a distinguished German scientist and his assistant, Dr. H. Krause. The remedy is called typosafrol, and is derivative of saffron. It is administered easily by mixture with the water which the cattle drink. The formula has not been made public, however, and there is a division of opinion as to whether an effective cure has been discovered for this cattle plague which costs stockmen all over the world millions of dollars annually.

As previously reported it is claimed that 290 head of cattle were successfully treated in recent experiments here and members of the Reichstag have asked the government to investigate the remedy. With a view to acquiring control of it if effective and furnishing it to cattleraisers at cost.

Prof. Bräger, who also recently announced a new method of treating sleeping sickness, is one of a large band of investigators who have been giving their attention to the foot and mouth disease germ, whose identity was only recently established by a Swiss scientist. Dr. Bräger believes that his discovery may not only be effective against the foot and mouth disease but against other germs, to which the blood of cattle is subject if only his claims to the former are borne out, however, that cure alone will be sufficient to confer a real boon to humanity for the disease has been one of the great factors in the high prices for meat.

A widespread epidemic of the disease occurred in 1890; 4,000,000 cattle were affected in 1899 and 1,000,000 in 1900, notwithstanding the most rigid quarantine measure and the slaughter of whole herds of cattle; and three years ago the pest again swept through the empire. Great number of farms are still infected.

The disease has even become a factor in politics, furnishing the basis for a great conflict between the government and the agrarians on the one hand and the Socialists, Radicals and other representatives of the middle and industrial classes on the other. The latter assert that the regulations closing the frontier to all foreign live stock are absurd in view of the fact that the herds of Germany are more extensively affected than those of most of the countries from which importation is possible and that the bars are kept up merely to let the land owners get high prices for their meat. They demand the raising of the quarantine, particularly against such countries as have for years been entirely free from the disease but quarantine against all is essential to a successful campaign.

A new epidemic of the disease is reported from the hunting preserves of South Germany, where deer are dying in large numbers. The loss in the Rhine province alone is already estimated at nearly \$125,000. The deer of the Wartenburg, Baden, Hesse and Lorraine also are seriously affected. And yet the disease appears not to have reached the hunting preserves of North Germany. Venison is as cheap in Germany as any meat and cheaper than some, and vast quantities of it are used. The spread of the foot and mouth disease to the hunting preserves will bring a marked reduction in the empire's meat supply, and the problem of combatting it successfully among wild animals is difficult.

SALEM BUSINESS CHANGE.

The Salem Feed and Flour Company has purchased the feed and flour business of G. C. Broadwater on Main street at Salem and will assume charge of it Monday morning.

Norway is extending its industrial training to embrace workers in the fish canning factories.

ROYAL BAKING POWDER

Is the Housewife's Greatest Help.

WHAT so tempting to the laggard appetite as a light, flaky, fruit short cake or a delicate hot biscuit?

Royal makes the perfect short cake, biscuit and muffin, and improves the flavor and healthfulness of all risen flour-foods.

It renders the biscuit, hot-bread and short cake more digestible and nutritious, at the same time making them more attractive and appetizing.

Royal Baking Powder is indispensable for the preparation all the year round of perfect foods.

Norway compels registration and ture films intended for public exhibition. official examination of all moving pictures.
